# Portfolio

**Connectors, couplers, pigtails, patch cords  
and multi fiber cable assemblies:**

- MPO/MTP
- SC
- LC
- SN/MDC
- CS
- E2000
- FC
- MU
- DIN
- ST
- Heavy duty / ruggedized connectors

**(Equipped-)Optical distribution boxes for indoor/outdoor installation**

**(Equipped-)Optical distribution boxes for data cabinets**

**(Equipped-)High capacity optical distribution enclosures/racks**

| **Active equipment for optical networks**

# Our quality assurance

## Quality starts at our front door.

An extensive quality control on our incoming goods is where our quality assurance starts. During the production process, every step of this process is constantly monitored.

At the end of the production line our QC department performs final quality tests including insertion loss and return loss making use of state of the art testing equipment.

All test are performed according all the known international quality standards as set for our products.

All internal company processes are subject to our ISO 9001, 27001, 45001 and 14001.

All cable assemblies come with a test report.

Data sheets are available for all our products.
